

SECURE AND SAVE: EFFORTLESS PROTECTION AGAINST CYBER THREATS

Managing cyber security risk is critical, yet the complexity and cost can be overwhelming.

While some organizations can employ huge teams to handle their cybersecurity most cannot. Yet everyone wants to benefit from new technologies and compete in today's fast changing business landscape. All the while dealing with a constantly changing threat environment. Being breached is an expensive proposition, between downtime, reputational damage, increased cyber insurance premiums, possible fines, and the cost of consultants to help get your systems back up. Incenter provides a proactive approach to stop breaches before they happen. Incenter reduces your costs yet gives you access to a level of cyber security previously only enjoyed by those with the deepest pockets.

Incenter keeps attackers out, meets compliance requirements, and enables you to focus on what's important.

20%	38%	\$82M	287 DAYS	\$9.4M
AVERAGE CYBERSECURITY BUDGET REDUCTION	REDUCTION IN REMEDIATION TIME	IN POSSIBLE COMPLIANCE FINES SAVED (AND COUNTING)	AVERAGE TO IDENTIFY AND CONTAIN A SECURITY INCIDENT	AVERAGE COST OF A SECURITY INCIDENT

BUILT FOR YOUR WHOLE ORGANIZATION

Incenter is a versatile solution tailored for individuals in diverse roles, from decision-makers to development teams. It serves as a unifying platform that enhances collaboration and productivity across the entire organization. With its customizable features and insights, Incenter equips every team member to work more effectively and cohesively, addressing cybersecurity challenges collectively.

MAKE ANY TEAM AN A-TEAM

Besides managing costs, the key for any security program is maximizing the effectiveness of your resources. The scarcity of good cyber security resources means they are expensive. Incenter was built by a team of security experts and they continue to work in the background helping it evolve. No matter what the size of your team is, or how skilled they are, Incenter will expand their capabilities and effectiveness. Personnel are freed up from security operations tasks enabling them to focus on other activities.

Whether you have 1 person handling your information security program, or hundreds, Incenter will help them achieve more.

MULTIPLE SOLUTIONS IN ONE

Everyone using technology pays for some number of security products. Each provides part of the solution to a complex problem - how to keep attackers out. However, the sheer number required creates as many problems as it solves.

Penetration tests are fantastic for finding complex issues which can have a major impact. However, they are usually only conducted once a year due to cost.

Vulnerability scans find basic issues, but are unlikely to stop an attacker with any degree of skill.

As more technology is used the **attack surface** (the way's someone might get in) only increases. Cloud solutions do not make this any easier.

The growing attack surface and issues found across it need to have an ever increasing amount of data to track in some kind of **vulnerability management** system.

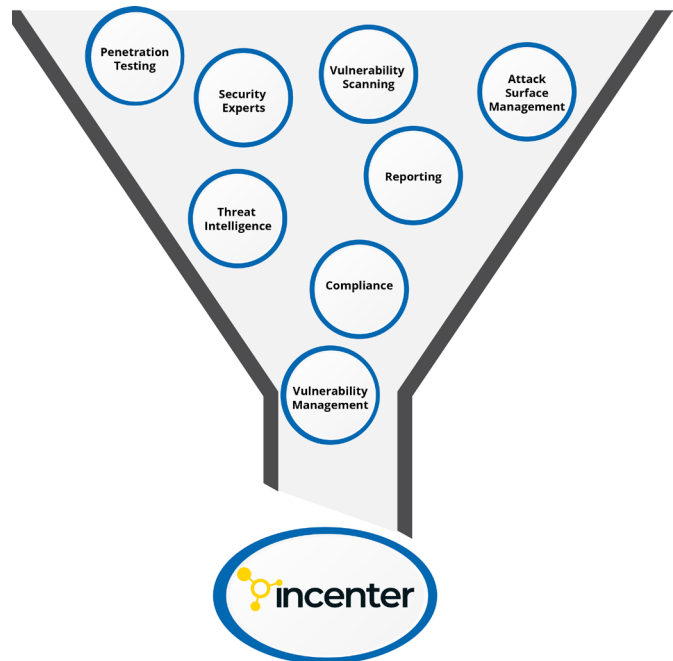

Compliance requirements affect all organizations at this point. Either penetration tests must be performed at a regular interval, products tested, or a variety of other requirements, all put additional burden on personnel.

Threat intelligence can help an organization make more informed decisions, although current offerings are varied and their usefulness is questionable.

Internal stakeholders, audit, external regulators, and customers require regular **reporting** on an organization's security landscape. These typically take time to write.

Finally, from all accounts there are not enough **skilled resources** to perform all these activities so external parties are used, with accompanying costs.

Incenter combines all of these into one easily deployed solution. Backed by a renowned team of experts, with input from organizations across sectors, and of all sizes. It's the only cyber security solution to guarantee cost savings and not drown you in noise.

**“INCENTER IS A TOTAL
GAME CHANGER IN THE
MARKET”**
